

Think out of the box. . . .

Deliver inside the box.

Special situations in software development.

Cuthbert is a systems integrator with a practice specializing in seaport, terminal and gate management systems.

Cuthbert supplies turnkey integration solutions that include the software, hardware, installation, supervision and deployment, as well as commissioning, training, and operating support for the useful life of our systems.

Cuthbert also offers strategic planning, company valuation, process improvement and international marketing with an emphasis on software application.

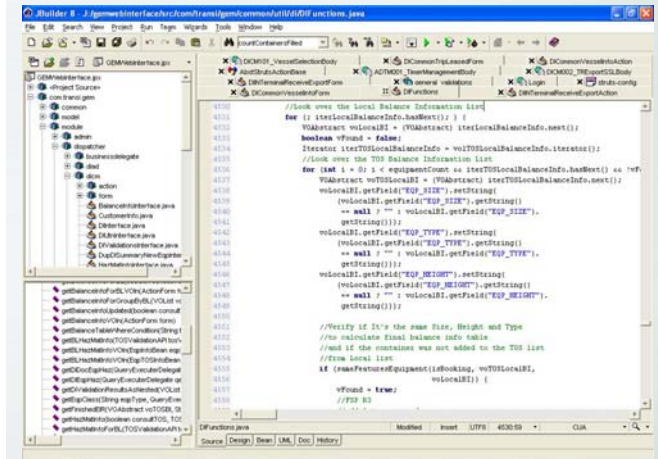

We stage our solutions with a proof of concept first, full operational deployment second and ongoing support.

N.C. Cuthbert, LLC
54 Norris Rd.
Denville, N.J. 07934
+1.973.983.7449

Time-boxed, fixed-price, full-featured custom software solutions.

Central to our business philosophy is the challenge of fear, uncertainty, and doubt (FUD). These are often compelling concepts that replace confidence, clarity and analysis. We at Cuthbert believe that solid experience, proven methodology and good science trumps FUD in any project situation.

Cuthbert is the only company to build a multi-gate, web-accessible RFID system for port terminal operators.

Our work facilitated inauguration of service at the Napoleon Avenue Container Terminal in New Orleans, Louisiana, on November 10, 2003, and has supported regular operations every day since.
